

Newtown AFC

3G Artificial Turf Pitch for Football

Newtown Football Club is one of the oldest clubs in Wales, being formed in 1875, and is one of the founder members of the F.A.W, as well as the League of Wales, now known as the Welsh Premier.

The reputation of their Latham Park ground has been enhanced by the construction of a top-of-the range 3G Football Turf system. The match pitch now boasts the market-leading FieldTurf Vertex 3G Turf system which provides a superb footballing surface and weather-proofs the facility from inclement weather. The FIFA 2-star certified 3G Turf was installed over a specialist E-Layer Performance Base to create an exceptionally high quality surface.

In addition to providing excellent playing conditions for the club, this facility is intended to help develop a 'hub' for local community activity and can be hired for recreational & training use.

In recognition of the consistently high quality and performance of the new 3G Pitch the facility was selected as the venue for the Welsh Cup Final.
