Are Your Pitches Ready for the New Season?

Even the best artificial turf systems need to be regularly maintained to retain their optimum condition and performance. Maintenance should follow a planned programme of specialist care to ensure your pitch is going to play as it should.

But if you have concerns about the condition of your facility now is the time to act – before we are too far into the football, rugby or hockey seasons. Do not wait until play is underway to find your pitch is causing problems:

- Inconsistent ball bounce
- Playing too fast or too slow
- Too firm underfoot
- Poor drainage
- Seam failures

Slatter Sports Maintain are experts in maintenance and aftercare and offer a National specialist works service with highly trained mobile technicians.

Remedial Works We Offer

- Rubber/Sand top ups for 3G pitches
- 3-day deep cleaning of the pitch pile
- Renewal of the pitch infill (sand and rubber)
- Re-marking painted pitch lines
- Replacing perimeter fencing or netting
- Specialised Pressure Washing to Netball and Tennis Courts
- Chemical Treatments to Netball and Tennis Courts
- Pitch Test Accreditations (FIFA, FA, FIH, World Rugby)

Possible problems with unmaintained artificial turf

Defective seam

Flattened pile

Moss infested surface

Contaminated surface

Select from the Elite range of maintenance programmes or choose to order 'as you go'.

Drag brushing

Power brushing

Decompacting pitch infill
